

Telehealth Mobile Kit

Transport a ProEX Mobile and a customised range of peripherals in one easy, portable solution.

The Visionflex Telehealth Mobile Kit is fully customisable to your needs and can include a ProEX Mobile, GEIS® HD General Examination Camera, HD Video Exam Glasses, Fingertip Pulse Oximeter, Digital Stethoscope, HD Dental Camera, ECG 3-Lead, Video Otoscope, Blood Pressure Cuff with Integrated Pump, Infrared

Ear Thermometer and the Telehealth Backpack with built-in wheels.

The sturdy backpack is high-quality and offers exceptional functionality and mobility. It can be wheeled or carried as required, while keeping all your equipment well protected secure.

Flexibility and functionality.

Telehealth Mobile Kit

Transport a ProEX Mobile and a customised range of peripherals in one easy, portable solution.

The Telehealth Mobile Kit offers flexibility and functionality. You can quickly wheel its sleek profile, or comfortably carry it as a backpack with the well-padded, extra wide straps.

With multiple storage spaces, there is a place for every peripheral. The fully padded device pocket adapts to snugly secure slim or large devices up to 17", or it can be removed completely for even more space in the main compartment.
